

Calibration Services

Visit our website at: www.bchltd.com

BCH offer an on-site calibration service for plant temperature probes and pressure transducers. During a calibration visit, one of our qualified engineers can remove your instruments and calibrate them immediately on-site. Once calibrated to UKAS traceable standards, a calibration certificate will be generated immediately, and issued to the site engineers or your quality department.

WHY CALIBRATE? THE BENEFITS SPEAK FOR THEMSELVES

- Accurate temperature control can help optimise plant efficiency.
- Traceable cook/cool results guaranteed to national standards.
- Batch repeatability for quality departments.
- The ability to meet strict supermarket quality and traceability requirements.
- Reduce energy consumption for running equipment, thus reducing energy costs and helping to meet government efficiency targets.
- Immediate spare and replacement parts of guaranteed quality can be supplied and fitted in the event that the instrumentation is faulty.

*Remove the hassle of always trying to organise and schedule instruments:
Let us do that for you by scheduling visits for every 6 months.*

Why not save costs and arrange for a full service visit at the same time?

If you are interested in optimising the efficiency of your equipment, or for further details of our calibration services, please ring Richard Holt on +44 1706 852122, mobile 07736 728108 or email: richard.holt@bchltd.com
